XII. CENTRAL DISPATCH REPORT—Director Donna Kuti updated members:

- Filled all of our positions lasting a total of one day but we are back down to 3 positions that need filling. Two trainees were in Phase 1 and for various personal reasons but no longer felt it was a fit. The other was a full-time position who transferred to a temporary part-time.
- Mike Cochran is really running/taking off with the Quality Assurance role and we have started looking at other things: Law enforcement time on air on initial dispatches averaging 16 seconds with most of this time being taken up with providing the incident type, address and cross streets. We also are looking at our time to dispatch once we hit a send time in ProQA - 54% of the time we are dispatching at the send point. However, since identifying this information and working with the dispatchers it has been improving and we expect a continued increase. ProQA Compliant and High Compliant calls are at 69%. We are falling short in Non-compliance with a percentage of 17% which is above the 7% Priority Dispatch standard. The majority of the non-compliance are a collection of minor deviations. Examples of a minor deviation were provided.
- Bruce Kral asked about time to dispatch standard. I referred to RJ Schall who confirmed NFPA is 90 seconds but that we really don't have a policy following that standard. Voiced some input on my position regarding NPFAs start times and advised NENA and APCO not giving a standard that I can find. Our goal is Pro-QA compliance levels.
- Call volumes from 2022-2023 went up by 13%; Call volumes from 2021-2023 went up 15%.
